## **Why you should choose Scavolini for your next project?**

*A kitchen is the center of the home and reflects the owner's personality, whether it is ultra-contemporary or comfortably traditional. A vast number of models, variants, finishes, and possible compositions make every Scavolini kitchen absolutely personal and unique.*

### **1. Scavolini History – 44 years in business.**

- Scavolini, a family-run business, originated in the town of Pesaro on the Adriatic coast of Italy.
- Since 1984 Scavolini has gained the leadership in the inner market, becoming and remaining the undisputed number-one kitchen furniture manufacturer in Italy.

### **2. Scavolini Design and Innovation.**

- It continuously commissions marketing agencies to anticipate new trends and analyze strategic choices.
- Scavolini sets design trends in the kitchen sector for others to follow.
- New designs are constructed by artists for aesthetics, designers for color and functionality, and architects for stability and structural integrity.
- Over 35 lacquered colors, 200 components, and thousands of combinations for each model allow for complete flexibility in each design.

### **3. Worldwide Name Recognition**

- Over one million families worldwide enjoy a Scavolini kitchen.
- Scavolini has achieved a high level of reliability, which is an integral part of the quality for it is known and respected in the industry.

## THE BEST SELLER FROM ITALY

### What are the benefits of a Scavolini Design?

#### 1. Scavolini attention to detail.

- UNI EN ISO 9001 certification: A “Quality Management System” guaranteeing that every component meets the preset quality standards of perfection.
- UNI EN ISO 14001 certification: An “Environmental Management System” that guarantees Eco-Friendly kitchens.
- All veneer, high-pressured laminate, tempered glass, and wood materials are water, vapor, and heat resistant.
- All drawer hinges and basket hinges are tested 60,000 to 80,000 times and door hinges 100,000 times.
- All stains and finishes are tested for toxicity and quality against light, water, and vapor.
- Every kitchen is tested via a vacuum chamber for toxicity to meet the ISO 14001 certification.
- Quality hardware: Blum hinges for doors and Blum Tandem boxes for drawers ensure a “quiet closing” every time.

#### 2. A wide range of choices.

- Over 30 models ranging from the Old World look to very contemporary. Five basic models combine the same high quality of finish materials and hardware of all Scavolini designs at a lower price point. More than 25 regular models offer the widest possible range of customization and creativity.
- Regular models consist of the highest quality in HDF, veneer, laminate, tempered glass, wood, and top-of-the-line Blum hardware.
- We can customize any of the units to the client’s specific needs.

#### 3. Special Considerations.

- Ergonomics (comfortable functioning) is an important part of Italian design and is incorporated into visible storage as well as hidden storage. For example, hanging rail systems under the wall cabinets place utensils at the most comfortable height for retrieval.
- Our UTILITY line utilizes the innovative Universal Design features for clients with special needs due to mobility issues or age-related differences. Space is at a premium in European kitchens; so Italian design excels at using space optimally. Every nook and cranny is outfitted for storage.
- Countertops, handles, and drawer pulls become an integral part of the cabinetry look and function. They mirror the shape and design details of the cabinets for a seamless look.

## WHERE ART AND QUALITY MEET

### What are the benefits to you ?

#### 1. Savings to You.

- The beauty of Scavolini is that prices are lower than Poggenpohl, Snaidero, Seimatic, and Bulthop without giving up any quality of those fine brands.
- Why is Scavolini able to do this and be successful? It all has to do with Economies of scale. Scavolini produces 35,000 to 45,000 kitchens annually worldwide, where as most manufacturers produce only 5,000 to 8,000 kitchens.
- When buying a Scavolini kitchen you are getting a Lexus-style kitchen for the price of a Toyota.
- Fewer construction scheduling conflicts. Scavolini kitchens are installed more like furniture so the other components such as flooring are installed in the kitchens prior to the cabinets being installed.
- We take the worry out of the design and shipping process. Scavolini will design, manufacture, and deliver your kitchens to your doorstep.

#### 2. Quality.

- With Scavolini's time-tested quality, there is no worrying about kitchens falling apart, fading, or warping.
- Our customers do not complain about the kitchen installation process. Instead, elated clients tell others of the wonderful quality kitchen they received from a reputable design firm.
- People purchasing custom homes, lofts, and condos with a Scavolini kitchen realize they are getting quality for the money they spend.
- We all know that a car has more value and beauty when given attractive accessories. Custom homes, lofts, and condos are no different. Putting a beautiful Scavolini kitchen in a home sets a developer apart from the competition.
- Developers have peace of mind knowing they have a highly reputable company standing behind the kitchens in their projects.

## IF PEOPLE SPEAK WELL OF US, THERE'S A REASON

### Scavolini's Major Projects

Gaining a leading place in a complex builder sector is not easy, even for a well-known brand. It needs huge resources, immense commitment and, above all, **the certainty of always being able to guarantee total reliability.**

Thanks to our models' **quality and fame**, and an **efficient organization** providing full service, Scavolini has been playing a major role in this sector for some time now.

Increasingly often, the most **luxurious residential complexes** all over the world are being constructed with Scavolini kitchens installed in every apartment.

From the United States, to the Far East, from the Caribbean to the Mediterranean, Scavolini provides its quality and style.
